Never Received Delivery	0	0	0	0	0	0	0	0	0	0
Received Wrong Item	0	0	0	0	0	0	0	0	0	0

Category	Sub-Reasons
DA Mishandled Package	Driver threw package; Driver dropped package; Driver left package in bad weather
DA was Unprofessional	Driver wasn't wearing Amazon attire; Driver was playing loud/inappropriate music; Driver showed potentially unsafe driving behaviors; Driver used inappropriate language; Driver walked on grass/mulch; Driver was talking on phone
DA did not follow my delivery instructions	Package not left in specific place I requested; Package not delivered according to instruction notes I provided; Package not left in appropriate location
Delivered to Wrong Address	Delivered to wrong unit number; Delivered to wrong street address; Delivered to neighboring address
Never Received Delivery	Package is not in location shown in delivery photo; Package was not delivered to location provided in instructions
Received Wrong Item	Received someone else's package

No POD on Delivery	0	0	0	0	0	0	0	0	0	0
Scanned - Not Delivered - Not Returned	0	0	0	0	0	0	0	0	0	0

#	Defect Category	What It Measures
1	Simultaneous Deliveries	DNR concessions from group stop deliveries where multiple packages were swiped to complete at the same time. Does NOT apply to packages delivered to mailroom (including apartments), receptionist, or a customer at the same address.
2	Completed Delivery >50 Meters	DNR concessions on packages marked as delivered more than 50 meters from the Geopin location provided to the DA in the Delivery App.
3	Incorrect Scan Usage – Attended Deliveries	DNR concessions on packages marked as: Delivered to Household Member, Delivered to Receptionist, Delivered to Mailroom Clerk, Delivered to Customer, Delivered to Security Guard, Delivered to Property Office, or Delivered to Other as Instructed.
4	Incorrect Scan Usage – Unattended Deliveries	DNR concessions where the DA did not follow the recommended delivery location shown in the Delivery App.
5	No-POD Deliveries	DNR concessions on packages where no Photo on Delivery (POD) was taken.
6	Scanned – Not Delivered – Not	Lost concessions where a DA marked a package as in-transit and either: (1) the package was never

Out of Return Label	-	-	-	-	-	-	-	-	-	-
Picked up, Not Returned	-	-	-	-	-	-	-	-	-	-

#	Defect Category	What It Measures	Programs Tracked
1	Time Window Adherence	Whether DAs perform pickups within the promised time window (e.g., SWA: 2:30pm–5:00pm local time, with a 15-min buffer). Pickups or exceptions outside this window are early or late defects.	SWA only
2	Geo Location Adherence	Whether DAs are within the required distance (meters) of the pickup geo-pin when entering exceptions. Threshold is 500 meters.	All pickup programs
3	Not Attempted	Failed pickup stops with no relevant action — no package scan and no exception selected by the DA to verify an attempt was made.	All pickup programs
4	Contact Compliance (CC)	Whether the DA followed contact compliance protocols when selecting specific exception reason codes. DAs must attempt to contact the customer (call for at least 12 seconds, then text if no answer) before marking a failure.	All pickup programs
5	Picked Up, Not Returned	Packages that were successfully picked up by the DA but not properly returned to the delivery station.	All pickup programs
6	Out of Return Label Failure	Defect triggered when a DA selects "out_of_return_labels" as the reason for a pickup failure. DAs are expected to collect all necessary return labels before starting their route.	All pickup programs

Weeks: 2026-W31 to 2026-W40

1. Exemptions for Delivery Completion

A. Successful CONTACT COMPLIANCE

NOTE: *Never "Select All" and mark packages UTA, UTL, NSL, Unsafe due to dog, or Customer Unavailable — this generates a CC miss on all TBAs and impacts DCR.*

Eligible Conditions: 1. Unable to Access • 2. Unable to Locate • 3. No Safe Location • 4. Unsafe due to Dog Bite • 5. Customer Unavailable

Standard Workflow

IF	→	THEN	→	THEN	→	✓
Eligible condition met		Call customer, wait 3+ rings		Text customer		Removed from DCR

Alternative — no phone, disconnected, or LAN line

IF	→	THEN	→	THEN	→	✓
Eligible condition met		Text OR Call Driver Support		Confirm TBA was Marked Correctly		Removed from DCR

B. Successful BUSINESS CLOSED Protocol

Four Criteria to Meet

1. DA within the Geofence
2. DA arrives within posted business hours
3. 30 seconds lapse between package scan & swipe to finish
4. DA marks package "Business Closed"

- Verify business hours are accurate; update in In-App Defects or GeoStudio.
- DA Controllables: Route Adherence, Pacing (arrival prior to business hours).

2. Best Practices for Delivery Completion

- Reattempt again at end of route prior to RTS.
- Attempt every package at least once — none left "in-transit" or "up next".
- Reattempt packages found on the van that were previously marked missing (via Itinerary & troubleshoot).

Why are packages showing in the RTS Dashboard as "No RTS Code Selected"?	When a DA does not select an RTS code while returning packages to the station, neither Amazon nor the customer receives detail on why the package was unable to be delivered. Packages returned to station without an RTS code count as a DCR defect by default.
